File Case Review Agreement

File Review of the Case: This is a standard rate of \$525 for reviewing all of the documentation you, or the Client, provide. This includes all reports, photographs, depositions, mathematical calculations and any other information provided. Essentially, a case file review will help you, or your client, determine if you would like to pursue the case further and/or hire Traffic Accident Solutions to investigate your accident.

A case review will provide you with initial opinions which are discussed with you, or the Client, verbally, usually over the telephone, with the disclaimer that it is always in the best interest to conduct a scene visit and observe the vehicle(s) in person. Note: Full payment must be made prior to the verbal consultation. Anything more than reading / reviewing reports are billed at an hourly rate; which includes any written opinions. As an additional disclaimer, a file case review may include basic/simple math opinions, but nothing which will be documented in a report or testified to without an accident reconstruction, and possible sensitivity analysis, to solidify the calculations, accuracy for the client, and the values of Traffic Accident Solutions. Data provided in a file case review are just estimates and opinions to be used as a guide and are subject to change if a full analysis is conducted or new information is discovered.

Traffic Accident Solutions does not perform investigations except with respect to fulfilling the professional mission of forensic consulting. As such, Traffic Accident Solutions relies substantially on Client-supplied information and documentation. Opinions put forth by Traffic Accident Solutions will be unbiased and may not comport with the Client's needs or desires for the case. Reconstructionists from Traffic Accident Solutions adhere to the laws of physics and present their cases based on a reasonable degree of scientific certainty of accident reconstruction.

If you choose to utilize the services provided by Traffic Accident Solutions, further information will be provided after the discussion.
